Have a feel.

Not only do Design Films look good, they feel good.

The Facts.

Architectural design films have been specially developed for the resurfacing market and can be applied indoor on most flat or slightly curved surfaces.

Self-Adhesive:

Easy application with a high quality durable adhesive that allows application onto most surfaces including Plywood and MDF, Solid Wood, Plastic, Metal and most lacquered surfaces

Conformability:

Excellent application characteristics with conformability that can cope easily with irregular surfaces and moderate curves.

Textured:

Textures that resemble natural materials that create visual impact and that high-end look.
