WORKPLACE SAFETY SOLUTIONS

Covid-19

The COVID-19 pandemic has fundamentally changed the world as we know it. People are living differently, buying differently and in many ways, thinking differently. Shopping and consumer behaviour and habits will have to change. This change will affect how we work, shop, eat out, exercise and socialise. Consumers will naturally be very anxious and worried about our new normal. With that in mind, **CGL Retail Solutions Ltd** are trying to make this change as easy as possible. We have put together a Covid-19 safety solution to suit all types of businesses. This comprehensive brochure will help you get your business up and running fast. All items shown can be manufactured bespoke to suit any requirement.

At **CGL Retail Solutions Ltd** we will unlock design ideas through creative thinking and enhance the customer experience adding huge value to the retailers. One key thing to remember is that this pandemic has happened to us all, its worldwide. We are all in it together and we all have the same fears as customers, so we have an idea of what they might be going through and what they might expect. Once the new normal comes into place and when you have all your Covid 19 safety solutions sorted you will then be back thinking of evolution and innovating at that point we are still the people to talk to **"innovation is what we do best!"**

To order any of the safety products in this brochure or to discuss any other new projects you may have, please contact one of our sales team on

059 913 0505 or **sales@cglretailsolutions.com**

CUSTOMER JOURNEY THROUGH STORES

3D ROOM SCANNING

We believe people will think twice about stepping into a crowded retail store going forward, touching and trying on products. To make your customers feel more at easy It will be very important to get your customers **“Motion Flow”** correct. At **CGL Retail Solutions Ltd** we are offering a room scanning service that will scan your store so you can see all your display in situ as they are now. It can be outputted as a 3D image or a floor plan. This will allow us to advise you on how the motion flow would work best to navigate your customers around your store to maximise their experience.

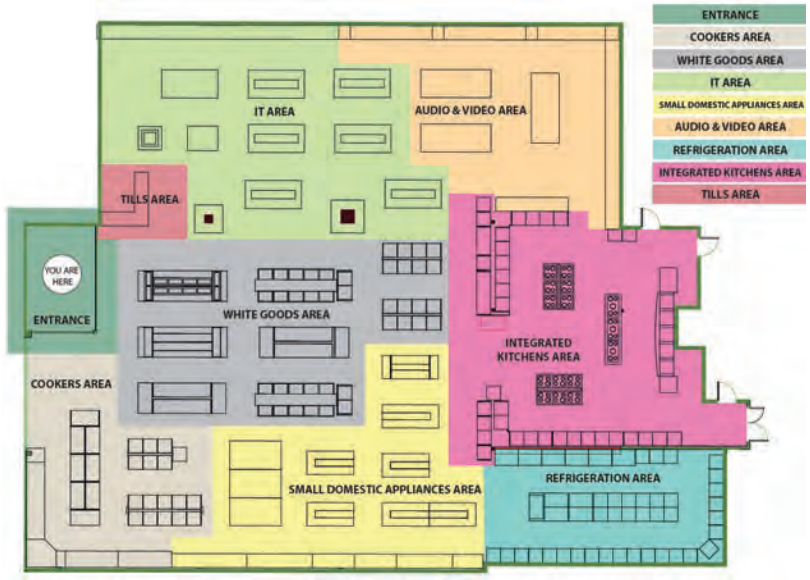
“Consumer Motion Flow” will reduce un-necessary time wasting when they may be looking to buy specific items. It will also allow you to see where you will need signage and sanitation stations etc. You can make decisions on taking out existing displays and see very easily how that might affect the flow of your store and the products with in your store. We can also produce a colour coded floor plan of your store which can be placed outside your store as people are waiting to get it. This will help your customers go to the area within your store with minimal disruption.

With this huge shift in the way we must start thinking, there is now an opportunity to tap into the customer and get the best out of the situation. With that in mind the other advantage to getting your store 3d scanned is going forward you have an accurate floor plan which will help you make decisions about product placement how to re-address stock and what is selling, positioning of FSDU's or other new displays that suppliers want you to install. Retailers across categories have to become innovative at every point of the consumer's buying journey by offering the most effective solution and by stimulating and engaging them to encourage sales.

Our Services include Shop Fitting, Sign Making, Innovative Designs, Large and Small Format Printing. We are Brand Builders - we can help you with Brand Strategy, Brand Communication, Brand product Presentation and Promotional Merchandising.

To place an order of for more information, please contact one of our sales team on **059 913 0505** or **sales@cglretailsolutions.com**

Example Floorplans



SMART ENTRANCE MANAGER

Automatic customer flow management

Key Features of System

Occupancy Displayed on screen at entrance. Maximum occupancy can be set by store and 'Traffic Light' displayed on screen store can also set bespoke messages

Text/email message can be sent to management/store security when store reaches a pre-determined threshold also management can view live data online via web portal

Occupancy widget can be placed on the store web website if desired – customers can then choose when to visit based on occupancy. This will help with queues outside stores

Our software package also gives customer access to:-

- All Standard Traffic Analytics Reports
- Real-Time Dashboard
- Software Updates
- Weather Analytics
- Data Integration (CSV)
- Support & Monitoring

COVID-19 FEVER DEFENCE

Protect the public, your staff and your business

Xenon Fever Defence units provide proactive protection for your business against the spread of Covid-19. Detection units are easily installed at building entrances to reduce the risk of symptomatic individuals entering the premises.

Xenon Fever Defence Units quickly measures the temperature of customers and staff entering your premises to test for fever symptoms. An audible / visible alarm is generated if an abnormal temperature is detected, requesting the individual not to enter the premises.

Complete protection solution including:

- **Temperature Testing Camera**
- **AI Fever Detection & Video Analytics Software**
- **8" LCD Tablet Interface**
- **Pedestal Mounting Stand**

xenon
Authorised Partner
